Code: 32002

# EVOLUTION 2-CYCLE TC-W3

## DESCRIPTION

**EVOLUTION 2-CYCLE TC-W3** is formulated with low-carbon forming base oils for use in 2-stroke engines. The oil is fortified with ashless detergent-dispersants and rust inhibitors to provide maximum engine protection and minimizes spark plug fouling, pre-ignition, ring sticking and combustion chamber deposits. The oil is designed for use in boats, snowmobiles, motorcycles, and power equipment such as chainsaws.

The premium base oils and special ashless additives that **EVOLUTION 2-Cycle TC-W3** is designed with allow it to meet NMMA TC-W3, making It an environmentally friendly lubricant. The oil ensures "no" tendency to form gel in the presence of contaminants. The ashless oil is designed to minimize carbon deposits in all high temperature air-cooled or water-cooled engines.

## FEATURES AND ADVANTAGES

- Meets NMMA TC-W3 specification.
- Meets – Mercury Marine, Evinrude and Johnson engine requirements
- Ashless formulation prevents spark-plug fouling
- Green color for easy identification
- Special ashless detergents keep pistons, rings, plugs, and ports clean for smooth operation and low maintenance costs
- Prevents piston and cylinder scuffing
- Suitable for engines requiring SAE 30 or SAE 40 oil (pre diluted)
- Well suited for air-cooled or water-cooled engines

## TYPICAL SPECS

TEST PARAMETER	ASTM TEST	
API Gravity	D-287	30.5
Viscosity: cSt @ 100°C	D-445	8.5
Appearance	Visual	Bright & Clear
Color	Visual	Green
<b>Product Number:</b> 12x1 L		19531
